Company Profile

Company History:

TNT Machining, LLC, is a proprietary machining company located in the Pacific Northwest outside of Bellingham, Washington. Primarily serving aerospace and marine companies, TNT Machining opened shop in January, 2007, and is making a name for itself with its attention to detail and pro-active customer service.

Employees:

With 4 employees and growing sales, TNT Machining is looking to expand its operations, and thus its production capabilities. With current trends in American manufacturing practices predicted to shift from Chinese-made parts back to North-American made parts, TNT Machining sits poised ready to take advantage of that global change.

Equipment in Use:

2011 Haas VF 2-SSYT (30x20x20 travels)

1998 Haas VF 2 (30x16x20 travels)

Burr-King tumbler

Bead blast cabinet

About:

TNT Machining can create finely-machined parts to its customers specifications in an efficient manner. Most notable of the company is its head programmer's ability to catch problems in parts and have them corrected before production, saving customers time and money.

Only a couple of hours from the Port of Vancouver, British Columbia, and a couple of hours from Seattle, Washington, both major shipping outlets, along with major firms, most notably Boeing, located in the region, the business prospect is superior. Given the ability to handle short-run jobs, TNT Machining is also well situated to take advantage of smaller contracts that larger companies choose not to take.
